EXECUTIVE ACTION SUMMARY

Wiifarmvest Technical Audit & Compensation Alignment

Target: Wiifarm Cooperative Society of Nigeria
Reference: Blueprint v1.0 & Audit Findings
Date: October 2026 • Single-Page Brief

Executive Summary: The core platform handles member registrations, e-wallets, and banking reliably. However, immediate intervention is required to **halt critical bonus overpayments (money leakage)**, **fix an affiliate underpayment bug**, and **implement missing leadership and reward features** required by the business blueprint.

1. CRITICAL FINANCIAL RISKS: STOP MONEY LEAKAGE & PAYOUT ERRORS (IMMEDIATE)

- **Indirect Referral Overpayment** SEVERE CASH LEAKAGE (+8%)
  Current State: The system pays 13% across 5 upline levels (6%, 3%, 2%, 1%, 1%), whereas the business blueprint strictly caps this pool at 5.0%. Total acquisition payouts currently exceed 30% against a 22% limit.
  Required Fix: Recalibrate the 5 upline tiers to total exactly 5.0% (e.g., 2%, 1%, 1%, 0.5%, 0.5%) to immediately stop profit erosion.
- **Registration Key-In Bonus** 100% BUDGET OVERRUN
  Current State: The data entry bonus is hardcoded at 2.0% per enrollment instead of the blueprint-mandated 1.0%, doubling planned costs.
  Required Fix: Update the payout rate from 2.0% down to 1.0% across all member registrations.
- **Affiliate Store Commission Bug** SEVERE UNDERPAYMENT GLITCH
  Current State: When a marketer sells a retail product with a percentage commission (e.g., 10% on a ₦40,000 purchase = ₦4,000), the system mistakenly credits a flat ₦10.
  Required Fix: Correct the store commission payout so marketers automatically receive their legitimate percentage earnings.

2. STABILITY & CRASH PREVENTION: REPAIR BROKEN FEATURES (WITHIN 1 WEEK)

- **Leadership Bonus System Crashes** SYSTEM OUTAGE RISK
  Current State: The leadership bonus module references core database components that were never created. Triggering this calculation crashes the platform.
  Required Fix: Build the missing database structures so the 4% leadership bonus can run smoothly without error.
- **Repeat Purchase Bonuses Disabled** FEATURE TURNED OFF
  Current State: The feature that awards upline sponsors when existing members purchase additional products was manually disabled in the system.
  Required Fix: Re-enable the upline repeat purchase pipeline so ongoing sales volume is properly credited.

3. MISSING BLUEPRINT FEATURES: DELIVER PROMISED MEMBER BENEFITS (2–3 WEEKS)

- **Stockist Sponsor Bonus (3.0%)** MISSING INCENTIVE
  Current State: The blueprint promises a 3% reward to members who recruit a stockist store, but the software has no mechanism to track or pay this.
  Required Fix: Link stockists to their sponsoring members in the database and automate the 3% monthly override.
- **Global Profit-Sharing Pool (1.25%)** MISSING DISTRIBUTION
  Current State: A 1.25% revenue share for top achievers is stipulated in the blueprint but currently has no tracking or payout tool.
  Required Fix: Implement a quarterly profit-sharing pool calculator for qualified leaders.
- **Wholesale Carton Packaging Option** WHOLESALE REQUIREMENT
  Current State: Inventory only tracks individual pieces rather than standard 15-pack cartons specified in operations.
  Required Fix: Add wholesale carton units (1 carton = 15 packs) to product catalog and stockist ordering forms.

4. FINANCIAL GOVERNANCE & POOL SEPARATION (PHASE 4)

- **Automated Revenue Split Ledgers:** Currently, all incoming revenue enters a single account and bonuses are paid out of general cashflow. Program the system to automatically divide all revenue into the 4 designated pools (**30% Company, 10% Executive, 5% Operations, 55% Compensation Reserve**) before payouts occur to ensure absolute financial safety.
